Distantial Philosophy – Postmodern Singularity

By Giorgio Agamben

I. Anarchism

In fact a distance into anarchism – a basketball court somewhere and back home. It also means rhythmanalysis in Jacotot on the matter of life which then plays out like basketball matches – the process is infinite.

II. Creativity in Capitalism

In fact then distantial philosophy becomes about pure potential life – which then is potential and Potenza – that other side of Aristotle's colour and doctoring Sirohi does, it is also potential which means natural potential of the colour. Finally it means that even economic is creative spirits or creative style like this thing they do in among the women in Sirohi's life which then has.a Potenza which is infinite because it is creative.

III. Singularity

The singular is always the postmodern singularity which is whatever, whatever singularity. I call this the poem of Sirohi – I love you not as such, or absolutely, but as whatever singularity which is then the process of recent Paulinian killing jokes on life of a Prophet – he is free he means – whatever.
